

Length measuring machine

To be used for the control of mounted length measurement systems and linear rails systems

Construction

The massive and inherently stable base plate is made of granite - natural hardstone. The air-cushioned measuring slide is equipped with exchangeable probes. Automatic measurement and value recording. Tailor-made construction.

Measurement tasks

- › Lengths
- › Distances
- › Straightness

Technical specifications

- › Measuring length: 5000 mm
- › Accuracy of length measurement: 0.001 mm / 1000 mm
- › Running accuracy of air-cushioned slide: < 0.001 mm / 1000 mm

Other dimensions and versions on request.
