

## portal construction - assembly for cmm

Assembly of natural hardstone - granite, consisting of 4 components.

### Construction

Tailor-made, weight-optimized construction keeping the precision requirements. The precision relevant faces are at top and bottom surfaces of the base plate and at the front surface of the traverse beam.

### Technical specifications

- › Dimensions: 1650x1450x1100 mm
- › Flatness and paralellsim of top and bottom surfaces: 0,002 mm
- › Rectangularity of portal beam to base plate: 0,002 mm

### Range of applications

- › Multisensor-co-ordinate measuring technolgies
- › Laser working
