

## Taper gauge setting device

To be used for the pre-setting of taper gauges. Tailor-made construction.

### Construction

The base is made of granite - natural hardstone. The taper gauge rests defined on two adjustable supports. With the help of an angle ruler equipped with an incremental angle measurement system, the desired angle can be adjusted.

### Measurement tasks

- › Measurement of angles

### Technical specifications

- › Range of angles: 0-45°
- › Depth of measurement max.: 400 mm
- › Pre-setting accuracy:  $\pm 10''$

Other dimensions as well as modifications or enhancements on request.
