

## Workpiece table - weight-reduced construction

Complex geometries in natural hardstone, granite, can be produced economically advantageous by shape and material specific tool development and working methods as well as use of modern cnc machine tools.

### Construction

Workpiece table of multi-sensor-cmm. With recesses for weight reduction. Equipped with threaded inserts for secure assembly of linear rails. Flatness und parallelism of both flat sides within 0,002 mm.

### Specification

› Dimensions according to customer's request

### Range of applications

- › Multisensor measuring technology
- › Optic machine tools
- › Special machines for electronic industry

Design to customer's request. Calculation of corresponding components by support of modern FEM-software.
